

Probucol

Common Name: Probucol

Compound Name: Acetone bis(3,5-di-tert-butyl-4-hydroxyphenyl) mercaptane

Compound: C₃₁H₄₈O₂S₂

Date Tested: 10/11/00

Tested By: N.F.

Total Compound Used: 80 mg

Comments: Currently off the market. Poor bioavailability. 500 mg tablet. Very poor solubility & dissolution.

Solubility Procedure: Heated to 60°C and vortexed for several minutes. Evaluated at 48 hrs.

Therapeutic Area: Antihyperlipoproteinemic
